

Comfort WIDE CROSS

ENG

DIMENSIONS: mm 3350 x 2000 x H 900

TOT WEIGHT: Kg 750

WORK PLAN INCORPORATED

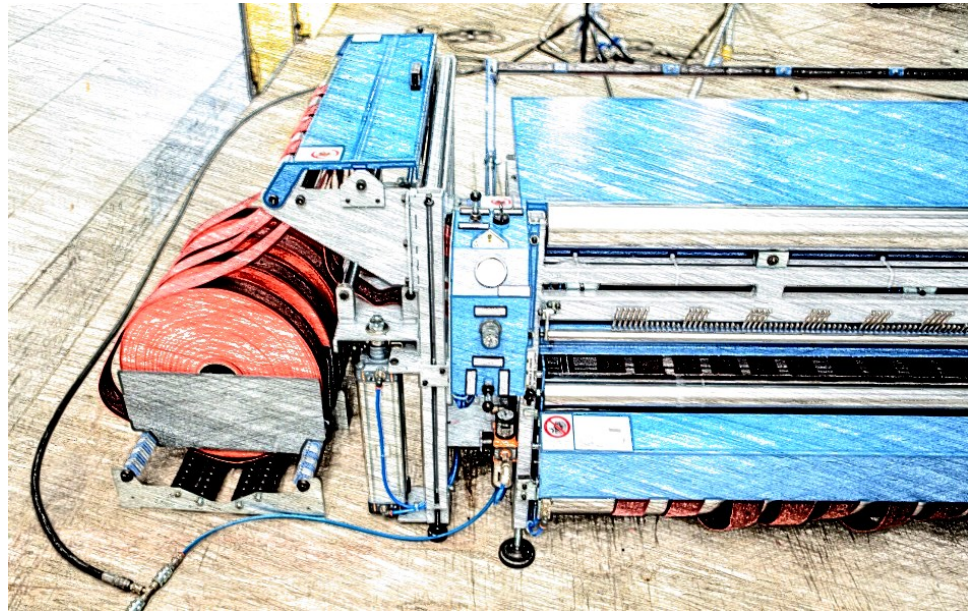

WORK PLAN DIMENSIONS: mm 2100 x 950

MAXIMUM BELTING SIZE: mm 650

MAXIMUM STROKE TENSION: mm 450

FUNCTIONING: COMPRESSED AIR

MAXIMUM OPERATION PRESSURE: bar 6

DESCRIPTION

The COMFORT WIDE CROSS adds to the COMFORT WIDE technology an innovative system that bends longitudinal belts.

This is a pneumatic machine that offers the possibility to regulate the elastic belts' tension depending on the type of seat desired and the number of belts used.

COMFORT WIDE is provided with a working table, already integrated in the structure, aimed at positioning the wooden frame. Its height can be adjusted thanks to a pneumatic engine or manually.

The webbing machine COMFORT WIDE is equipped with various security systems; the materials and the components used were selected to minimise the risks for workers.
